

••••• ONLINE CLASSES @ GCFS •••••

At GCFS, we want to ensure our students have flexibility and choice when it comes to taking classes. That's why we allow students to take online classes and receive high school credit that will count towards their graduation requirements. Students can choose from our selection of pre-approved online course providers to make up required credits without attending summer school, get a head start on early graduation, or take classes that are not offered at GCFS. Here are the online high school course providers that are accredited and have been pre-approved by us to count towards graduation requirements:

FAQ

▶ How does a typical online class work?

Online courses are delivered through an online learning platform, where you at your own pace toward scheduled due dates. A virtual teacher is assigned to facilitate the course. All assignments, quizzes, and tests are submitted online. Depending on the course, there will be computer-scored and teacher-scored activities and tests that are submitted electronically. You will have 24/7 access to the course content, and most times, you are not required to be online at a specific time, unless you wish to take advantage of the teacher's posted office hours or the virtual live web classes. The flexibility of online learning makes it possible for students to work at their own pace.

▶ How many online courses am I allowed to take per semester?

If you are taking a full course load at school (8 classes), then we recommend just one online course per semester. If you decide to take an online course before your semester schedule is finalized (usually the first week of the semester), then we try our best to include a study hall in your schedule so that you can dedicate some school time to those online classes. Keep in mind, though, that a study hall is not guaranteed and is often decided case-by-case.

▶ Do I get college credit for these courses?

No. These are not college courses. They are just like the courses that you take at school. Even if you take an AP class, you will not receive college credit unless you pass the AP exam. If you pass an AP exam, a college may give you credit, but that is up to each individual college or university.

▶ Do these courses require additional resources?

It depends on the course and provider. Most programs provide all the materials you need, but some courses will require you to buy a textbook, an e-textbook, or additional resources. Some AP science courses require a lab portion, which means you will have to purchase the necessary lab materials to complete that portion.

▶ What is the workload like?

The amount of time you will spend varies by course. The time commitment is similar to what you might spend in a regular school class.

▶ Can students work at their own pace? Do assignments have due dates?

You will have 24/7 access to the learning platform, which means you can work at your own pace. Once again, it depends on the program and the type of class you enroll in, but in general, deadlines and due dates for assignments are given to help keep you on track.

▶ How does grading work?

Online courses are graded by instructors provided by the online course providers. Instructors assign grades on the basis of a student's performance, just as you are graded in your regular school classes. Upon completion of the course, the online course providers will provide us with transcripts. Once we receive the transcript from the online course provider, the course and the grade will be entered into your records.

▶ What happens if I fail or do not complete an online class?

Since online courses are not part of the requirements for our school, online course grades won't be entered into your records upon request. If you fail the course or do not complete it on time, you are free to re-take the course. Keep in mind that online courses are non-refundable once you start, which means you will have to pay the course fees again if you were to re-take a course.
